

Cement
LEMA

El cemento ha sido el principal material de construcción empleado por la humanidad.

Las calizas, arcillas y el yeso eran los minerales que abundaban en la naturaleza. Según fuentes históricas, el pueblo egipcio (2600 aC ya utilizaba un mortero (mezcla de arena con materia cementosa) para unir bloques de piedra y levantar sus prodigiosas construcciones.

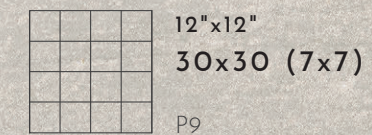

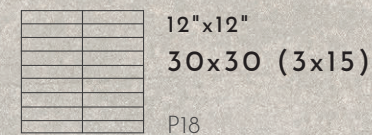

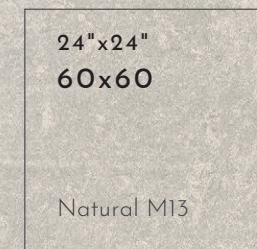

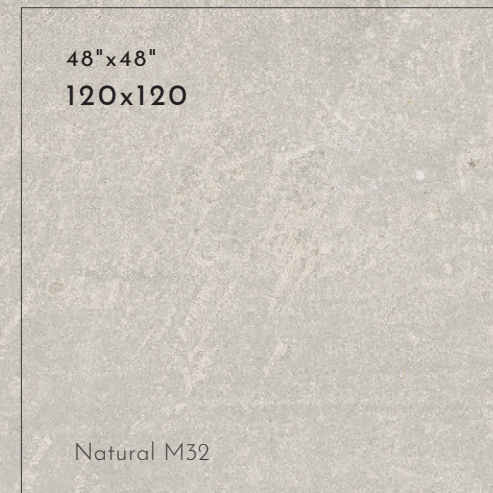

La colección Lema quiere hacer un pequeño homenaje a esos primeros materiales cementosos que empleó el ser humano y que han ayudado al desarrollo de nuestras civilizaciones.

Cement has been the main building material used by mankind.

Limestone, clay and gypsum were the minerals that abounded in nature. According to historical sources, the Egyptian people (2600 BC) already used a mortar (a mixture of sand and cementitious material) to join stone blocks and erect their prodigious constructions.

The Lema collection wants to pay a small tribute to those first cementitious materials used by human beings and that have helped the development of our civilizations.
