COUVET

collection

Welcome to a fascinating journey where light and shadow alternate creating a mosaic of colors and shapes.

Bienvenidos a un viaje fascinante donde la luz y las sombras se alternan creando un mosaico de colores y formas.

A few months ago, I had the opportunity to visit the Couvet forest, a magical place where the oldest forest history is preserved. I was amazed at the beauty and sustainability of this forest, that it respects the environment and the local economy, and that it reflects the values that I share. In this forest, light and shadow alternate creating a diverse landscape full of life. I was able to observe the different species of trees, plants and animals that coexist in harmony. I felt part of nature, and I wanted to take a little piece of it home with me. For this reason, I chose the materials that are inspired by that forest, which offer me unique and original textures, with the energy of the wildest nature. Now, every time I see the harmonious colors and delicate tones of my furniture, I feel the stone and wood under my fingers, and I connect with the essence of nature. My materials are of high quality and durability, and allow me to create warm and elegant spaces. I am very happy with my choice, and I recommend that you also try these materials.

I assure you will not regret.

Hace unos meses, tuve la oportunidad de visitar el bosque de Couvet, un lugar mágico donde se conserva la historia forestal más antigua. Me quedé maravillado con la belleza y la sostenibilidad de ese bosque, que respeta el medio ambiente y la economía local, y que refleja los valores que comparto. En ese bosque, la luz y la sombra se alternan creando un paisaje diverso y lleno de vida. Pude observar las diferentes especies de árboles, plantas y animales que conviven en armonía. Me sentí parte de la naturaleza, y quise llevarme un pedacito de ella a mi casa.

Por eso, elegí los materiales que se inspiran en ese bosque, que me ofrecen texturas únicas y originales, con la energía de la naturaleza más salvaje.

Ahora, cada vez que veo los colores armoniosos y los tonos delicados de mis muebles, siento la piedra y la madera bajo mis dedos, y conecto con la esencia de la naturaleza. Mis materiales son de alta calidad y durabilidad, y me permiten crear espacios acogedores y elegantes. Estoy muy contento con mi elección, y te recomiendo que tú también los pruebes.

Te aseguro que no te arrepentirás.

integral collection

Couvet is the solution that comes to cover a wide spectrum of needs, a very versatile series, with a multitude of possibilities, in which we have thought so that the different materials can be combined with each other.

Couvet has a well-studied range of colors with soft, warm gray tones, with different finishes of the material depending on the use for which it is intended; all chosen so as not to fall into monotony.

Couvet es la solución que viene para cubrir un gran espectro de necesidades, una serie muy versátil, con multitud de posibilidades, en la que hemos pensado para que los distintos materiales se puedan combinar entre ellos.

Couvet dispone de una gama de colores muy estudiada con tonos grises, suaves cálidos, con diferentes acabados del material según el uso al que vaya destinado; todo elegido para no caer en la monotonía.

Safety clip for facades with mortared tiles.

Grapa de seguridad para fachadas con azulejo amarterado.

VENTILATED FACADES represent a sustainable and environmentally friendly solution, with innovative advantages in the habitability of spaces.

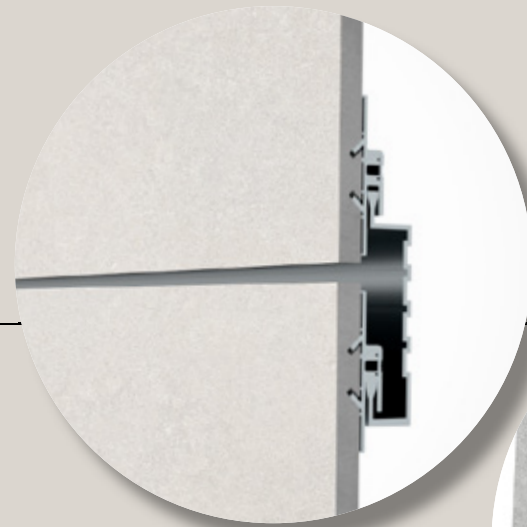

They represent energy savings of up to 30% by avoiding thermal breakage and establishing a direct barrier of solar radiation on the surface, also prevents internal condensation thanks to the air chamber and eliminates the appearance of humidity. It is also necessary to consider the acoustic reduction towards the interior by 10%.

But without a doubt and most importantly, it means a quick and easy rehabilitation giving a new, more updated and modern life to our buildings.

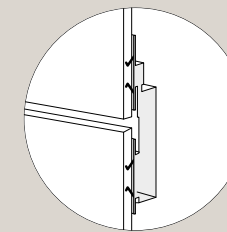

Las FACHADAS VENTILADAS suponen una solución sostenible y respetuosa con el medio ambiente, con ventajas innovadoras en la habitabilidad de los espacios.

Suponen un ahorro energético de hasta el 30% al evitar los puentes térmicos y establecer una barrera directa de la radiación solar sobre la superficie, asimismo previene condensaciones internas gracias a la cámara de aire y elimina la aparición de humedades. También hay que considerar la reducción acústica hacia el interior en un 10%.

Pero sin lugar a dudas y lo más importante, supone una rehabilitación rápida y sencilla dando una nueva más vida actualizada y moderna de nuestros edificios.

CONCEALED FIXING SYSTEM.

SISTEMA FIJACIÓN OCULTO

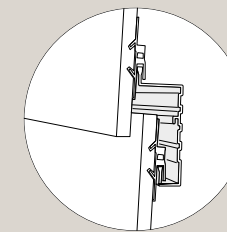

The mixed (mechanical and chemical) hidden longitudinal fixing system works with two pairs of grooves on the back of the plate that allow the intersection of profiles.

El sistema de fijación longitudinal oculta mixta (mecánica y química) trabaja con dos pares de ranuras en el dorso de la placa que permiten la inserción de perfiles.

Espesor: 6 mm - 8,5 mm de espesor con malla de refuerzo. 6 mm - 8,5 mm thickness with reinforcement mesh. 8,5 mm - 14 mm de espesor - 8,5 mm - 14 mm thickness. 14 mm - 20 mm de espesor - From 14 mm - 20 mm thickness.

CONCEALED FIXING SYSTEM.

SISTEMA FIJACIÓN OCULTO

The C.A.T 6 system offers a totally innovative finish with the pieces placed obliquely, obtaining a façade in the form of scales. It is a mixed hidden fixing system (mechanical and chemical). It works with a pair of longitudinal grooves on the upper and lower backside. The adhesive is an elastomer adhesive that allows the fixing of the hanger and locking profiles.

El sistema C.A.T 6, ofrece un acabado totalmente innovador con las piezas colocadas en oblicuo, obteniendo una fachada en forma de escamas. Es un sistema de fijación oculta mixta (mecánica y química). Funciona con un par de ranuras longitudinales en el dorso superior e inferior de la placa, y un adhesivo elastómero que permite la fijación de los perfiles de percha y cierre.

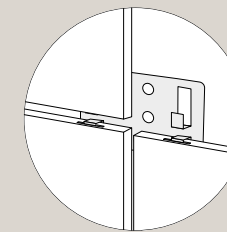

Espesor: 6 mm - 8,5 mm de espesor con malla de refuerzo. 6 mm - 8,5 mm thickness with reinforcement mesh. 8,5 mm - 14 mm de espesor - 8,5 mm - 14 mm thickness.

CONCEALED FIXING SYSTEM.

SISTEMA FIJACIÓN OCULTO

In contrast to the visible system, this hidden and longitudinal chemical mechanical system uses steel clips which are inserted into the grooves previously made in the ceramic edges.

A diferencia del visible en este sistema de mecánica química oculta y longitudinal se usan clips de acero que se insertan en las ranuras previamente realizadas en los bordes cerámicos.

Espesor: 8,5 mm - 14 mm de espesor - 8,5 mm to 14 mm thickness.

(cat.3+visto)
